

true_type

```
google::protobuf::is  
_proto_enum< ::caffe  
::ParamSpec_DimCheckMode >
```

The diagram consists of a light gray rectangular box at the top containing the text 'true_type'. Below it is a larger, darker gray rectangular box containing three lines of C++ code. Two blue arrows originate from the top edge of the code box and point upwards towards the 'true_type' box, indicating a relationship or inheritance between the code and the variable name.
